As Rope Access Technician I...

... I participated in many different projects. Working both onshore and offshore led me to become highly experienced in working in difficult and demanding conditions and circumstances. I consider myself a good team player and always focus on achieving targets safely...together. Being part of teams for different companies (e.g., Brand Safway, WP Group B.V., Muehlhan B.V., Van Oord, Mammoet, DIRA-Group, and many more) helped me understand how to achieve a goal as safely and quickly as possible whilst having a good time working. Rope Access Techniques have fulfilled my active lifestyle and become not only work, but a hobby also!
